Fields in the RICOH ProcessDirector Plug-in for Adobe Acrobat cut off values

Monitors with a very high resolution and certain display settings can cause problems in the way information is displayed.

To change the way entry fields are displayed in the RICOH ProcessDirector Plug-in for Adobe Acrobat:

1. Right-click the Desktop and select **Display settings**.
2. Under **Scale and layout**, change the **Change the size of text, apps, and other items** value to **100%**.
3. Restart the computer for the change to take effect.

⬇ **Note:**

- If this change makes the fields too small to use, try changing the **Resolution** value.
