Modifying or deleting AFP Editor definitions

After you create barcodes, text, hidden areas, or definition conditions, you can modify or delete any of them. You can also create and modify conditions if you have defined at least two barcodes.

In this section:

[Modifying barcodes](#)

You can modify the barcodes that were created with AFP Editor. You cannot modify barcodes that are defined in the AFP file itself.

[Deleting barcodes](#)

You can delete the barcodes that were created with AFP Editor. You cannot delete barcodes that are defined in the AFP file itself (instead, you can create areas to hide barcodes).

[Modifying conditions between barcode definitions](#)

You can modify the conditions that AFP Editor uses to determine which barcode is used.

[Deleting conditions between barcode definitions](#)

You can delete the conditions that AFP Editor uses to determine which barcode is used.

[Modifying hidden areas](#)

You can modify the hidden areas that were created with AFP Editor.

[Deleting hidden areas](#)

You can delete the hidden areas that were created with AFP Editor.

[Modifying text strings](#)

You can modify a string of text that was created with AFP Editor. You cannot modify text in the AFP file itself.

[Deleting text strings](#)

You can delete a string of text that was created with AFP Editor. You cannot delete text in the AFP file itself (instead, you can create areas to hide text).
