

## Managing objects

[Managing system objects](#) / Repositories

# Repositories

You can work with repositories to do a variety of tasks.

### In this section:

[Changing the retention period for a repository.](#)

You can change the **Retention period** of an existing repository to increase or decrease the period of time it stores job and document data and history information.

[Changing the folder location for a repository.](#)

You can change the **Folder location** of an existing repository.
