/ Deleting conditions between barcode definitions

## Deleting conditions between barcode definitions

You can delete the conditions that AFP Editor uses to determine which barcode is used.

To delete a definition condition:

1. In RICOH Visual Workbench, open a sample AFP file and the control file that contains the definitions for conditions. Then click **Mode**  $\Rightarrow$  **AFP Editor**.
2. Click **Tools**  $\Rightarrow$  **Modify Definitions**.  
You see the Modify and Delete Definitions window with a list of the definition conditions.
3. Select the definition condition that you want to delete.
4. Click **Delete**, or press the Delete key on your keyboard.  
The definition condition is removed from the list.
5. To close the Modify and Delete Definitions window, click **X** in the upper right corner.
