

Configuring

[Configuring](#) / Setting system properties

Setting system properties

System properties apply to the overall RICOH ProcessDirector environment, which includes the primary server and any application/secondary servers. Some of the properties apply to all the jobs that RICOH ProcessDirector creates.

To set system properties:

1. Click the **Administration** tab.
2. In the left pane, click **Settings** \Rightarrow **System**.
3. Enter values for the properties that you want to change.
4. Click **SAVE**.
