Managing objects

Exporting data in the Reports database to a CSV file

You can export data in the Reports database to a file in comma-separated values (CSV) format.

To export data in the Reports database to a CSV file:

1. Click the **Administration** tab.
2. Select **Reports ⇒ Data Collectors**.
3. Select the data collector whose data you want to download and click **Download data**.
4. Specify a time range for the data to download and click **OK**.
