Configuring

Defining Kodak PDF printer devices

Kodak PDF printer devices represent specific models of Kodak printers that can print PDF or Postscript files. Jobs are assigned to Kodak PDF printers using scheduling properties.

Both Kodak PDF printer devices and Passthrough printer devices can print jobs in PDF or Postscript format. Kodak PDF printer devices support more functions such as sending values for media and finishing to the printer. If Kodak PDF printer devices support your printer model, we recommend that you define a Kodak PDF printer device rather than a Passthrough printer device.

To define a Kodak PDF printer device:

1. Click the **Administration** tab.

2. In the left pane, click **Devices ⟹ Printers**.

3. Click **Add ⟹ Kodak PDF Printer**.

4. On the **General** tab, fill in values for all the required fields.

   > **⬇ Note:**
   > ○ The printer driver reports status information in the language that you selected when you installed the RICOH ProcessDirector server. To receive messages from this printer in a different language, set the **Printer language** property appropriately.

5. On the **Scheduling** tab, enter the values that you want RICOH ProcessDirector to use to assign jobs to this printer. Leave the values blank or **Not set** for any properties that should not be used for scheduling. Those values match any values specified by the corresponding job scheduling properties.
   If you want to schedule jobs to a printer based on media, keep these items in mind when you set the **Media supported** property:
   ○ If you choose specific media, only jobs that use that media can be scheduled to this printer.
   ○ If you choose **Ready media objects**, only jobs that require the media that is currently loaded in the printer can be scheduled to the printer.
   ○ If you choose **All media**, all jobs can be scheduled to the printer, regardless of what media is actually loaded.

6. Click **OK**.
