Configuring

Notifications

You can configure these types of notifications and use the copy function to create additional notifications.

In this section:

[Email notifications](#)

You can configure email notifications by doing the tasks described in this section.

[History record notifications](#)

You can configure history record notifications by doing the tasks described in this section.

[Web service notifications](#)

You can configure REST and SOAP web service notifications.

[Copying notification objects](#)

You can copy a notification and use it as a template for creating another notification. Copying notifications can save you time, especially when you need to create several notifications with similar properties.
