Configuring

Setting up the Quadient Inspire Connect feature

After you read the Quadient Inspire Connect overview topics, you can set up Quadient Inspire Connect by doing the configuration tasks described in this section.

After the initial configuration is complete, test your Quadient Inspire Connect workflows to make sure they work as you expect them to.

In this section:

[Setting up step templates to send jobs to Quadient Inspire Designer](#)

Copy and customize the **ComposeAFP** and **ComposePDF** to send jobs to Quadient Inspire Designer for processing.

[Configuring to work with Quadient Inspire Designer for AFP print jobs](#)

Quadient Inspire Connect makes it easier to configure workflows that interact with Quadient Inspire Designer to generate or reformat AFP print jobs.

[Configuring to work with Quadient Inspire Designer for PDF print jobs](#)

Quadient Inspire Connect makes it easier to configure workflows that interact with Quadient Inspire Designer to generate or reformat PDF print jobs.
